

Checking out the camouflage capabilities of the STAUFF Connect Academy bike!!!

Racing round the track at Brands Hatch in the National 1000cc Superstock Championship, Team WD40 rider Mason Law's bike slipped out from underneath him at a corner.

"I was suddenly sliding along the tarmac on my bottom and then cartwheeling through the gravel" In this instance I was VERY lucky to say the least."

Miraculously Mason managed to walk away unscathed - and immediately went looking for his STAUFF-Connect Kawasaki Zx10rr. >>>

Miraculously Mason managed to walk away unscathed

Mason managed to find his bike in the trees

However the bike had flown so far off the track and up into the trees it took him and the crew at least 10 minutes to find it, he said.

“One minute I’m in third position of my race the next I’m bushwhacking trying to find my bike,” he said.

“It was almost movie-esque when I looked up and saw it hanging from a tree.”

Mason was back up and running the next day after a team from Stauffbike built him a new bike over night.
