

STAUFF Ireland secures new contract

Thanks to Lisburn City Council's 'Generate' programme, Lisburn-based STAUFF Ireland has successfully won a contract from a wind turbine maintenance company to replace parts in 400 turbines across Ireland.

The 'Generate' Programme is funded by Lisburn City Council, Belfast City Council and

Castlereagh Borough Council, and is part funded by Invest Northern Ireland and the European Regional Development Fund under the Sustainable Competitiveness Programme for Northern Ireland.

'Generate', delivered by Belfast Met, provides support and training for employees in small and medium sized enterprises (SMEs) in the council areas of Lisburn, Castlereagh and Belfast who are keen to discover progressive opportunities for their company and their employees in emerging renewable markets for wind, marine, bio-energy, smart-grid and energy storage.
